Summary

I am a third year medical student at the University of British Columbia with a passion for medicine and technology.

Professional Experience

MEDICAL STUDENT INTERN   September 2016 - Current
Curatio.me

As an independent project through school, I have worked with the company to start a Crohn's and Ulcerative Colitis community, where I have developed the medical trackers and medical information for the patients. I have also helped work on other communities, supplying medical information and finding proper resources.

ECOLOGIST   May 2014 - July 2014
National Bison Range

Worked as researcher at the National Bison Range in Montana with Dr. Gary Belowksy. I worked on behavioural ecology project looking at how population levels changed with seasonal and climate changes. Learned ecological sampling procedures, research techniques and population density graphing.

CUSTOMER SERVICE REPRESENTATIVE   January 2011 - May 2014
Scotiabank

Worked on the front line with customers dealing with cash deposits and withdrawals, cheques, transfers, bills, money orders, credit card payments and other related banking transactions. Resolved problems and answer inquiries concerning customers' accounts. Gained high customer service level and knowledge of financial information.

STUDENT RESEARCHER   May 2013 - July 2013
University of Notre Dame

Worked as student researcher in Wisconsin, USA with the University of Notre Dame Environmental Research Centre. I worked on behavioural ecology project looking at how invasive and native snail species react to sensing predators. Learned sampling techniques in aquatic and field habitats, experimental design and statistical programming.

Education

MEDICAL SCHOOL   September 2016 - Current
University of British Columbia

WEB DEVELOPMENT BOOTCAMP   August 2018 - Current
Lighthouse Labs

Skill Stack

Bootstrap / CSS / Express / Heroku / HTML5 / jQuery / Javascript / Node.js / NPM /PostgreSQL / Sass / Photoshop

Projects

Angie & Frank's Pizza

September 2018

An online ordering website where hungry clients of this fictitious restaurant can visit its website, select one or more dishes and place an order for pick-up. They will receive a notification when their order is ready, using the Twilio API.

Twonster

September 2018

Twonster is a simple, single-page Twitter clone that is aimed at a younger demographic. It can be used to teach and demonstrate how social media and technology works. Twonster allows a user to compose a tweet, post it and then have it show up directly into their feed.
